- **Transfer of Responsibilities-AB 469**

1. Do you support moving forward with a recommendation for the transfer of responsibilities for January, 2018, as outlined in the document, Clark County Schools Achieve-Transfer of Responsibilities? The recommendations were not clearly articulated in the previous voting or information shared on this topic. James Gibson Elementary School's SOT, collectively, disagrees with the "considerations list" provided in the letter from Pat Skorkowsky to all principals, dated October 12, 2017 under the subject heading: transfer of responsibilities. We don't feel that we have been provided with enough information to make the decision with the information that has been provided. We feel that this immense decision is being forced upon our team without proper explanation of each item listed as "considerations" on page 2 of the document. We can not support moving forward with the recommendations with the information provided.
2. What other considerations do you have for additional recommendations for the transfer of responsibilities? See response to question 1.

- **Public Comment Period**
